

SOFTWARE ENGINEER + TECHNICAL GENERALIST

SOFTWARE FOR THE REAL WORLD

I build the software, product, and operating systems that make intelligent machines useful in the field.

80K+

AUTONOMOUSLY TILLED ACRES

\$1M+

GROSS FIELD-PLATFORM REVENUE

10M+

DAILY USERS AT TWITCH

2

COMPANIES ACQUIRED

OPERATING THESIS
/ 001

The work is not finished when the model works. It is finished when the system survives the field.

HARDWARE IS EATING THE WORLD
ESSAY FORTHCOMING

01

PHYSICAL-AI LAB

Independent Engineer
JUN 2026 → PRESENT

Launched an independent lab spanning robot-policy training, hardware bring-up, teleoperation, data collection, evaluation, deployment, and failure analysis. Trained an ACT policy on 206 PushT episodes and made partial progress and zero completed tasks equally visible.

02

BASELINE HEALTH

Founder + Product Engineer
FEB → MAY 2026

Solo-built an AI-native health system across React, TypeScript, Python, FastAPI, wearable and lab ingestion, LLM orchestration, longitudinal scoring, and deterministic audit paths; onboarded founding members and refined the product with real data.

03

HARDTECH PRODUCT

Pixel Foundry · OmenAI · TurbineOne
JAN 2024 → JAN 2026

Led product and platform work across predictive maintenance and edge ML in contested environments after advising teams in defense, construction, mining, and AgTech. Turned sensor data, operator needs, and unreliable connectivity into model priorities and field workflows.

04

BEAR FLAG ROBOTICS

Senior SWE → Product + Technical Lead
FEB 2020 → MAR 2023 · ACQUIRED BY JOHN DEERE

Co-led software and product systems supporting **more than 80,000 autonomously tilled acres** and **more than \$1 million in gross platform revenue**. Coordinated customers, autonomy, tractor engineering, and field operations.

05

TRUST AT SCALE

Twitch identity · Over teams
2016 → 2019 · OVER ACQUIRED BY GODADDY

Built identity and authentication systems affecting **more than 10 million daily users** at Twitch. At Over, led enterprise web delivery, helped bring web to parity with iOS, and contributed to threefold enterprise-account growth.

RANGE + FORMATION

BUILD · OPERATE · INTEGRATE

TypeScript, Python, React, Node.js, FastAPI, SQL · AWS, Docker, APIs, pipelines, CI/CD, observability · LLMs, model evaluation, UX research, product strategy

EDUCATION

George Mason
BA, Philosophy, 2012

FURTHER STUDY

Oxford, Distinguished Exchange Student Program, 2010–2011 · Reforge, Product Strategy and Product-Led Growth, 2022
