

Andrew Deal

Product / FDE | Industrial Software & Physical AI

Mountain View, CA | 415 200 9584 | deal.e.andrew@gmail.com
andrewdeal.info | linkedin.com/in/adeal | github.com/a-deal

Product leader and hands-on engineer with **10+ years** in software and product. Led **Deere's \$40M Carver autonomy project** and construction pilot conversions generating **\$3M+ in revenue**.

EXPERIENCE

Pixel Foundry

Mar 2023 to present

Engineering & Product Consulting in Physical AI

Consulting engagements with venture-backed startups, plus independent engineering.

- Led product and account management strategy that converted construction pilots into **\$3M+ in revenue**.
- **Architected a web platform and sensor-data pipelines** for an industrial sensing startup (raised a \$31M Series A in 2026). Covered the full detection and mitigation workflow for hydraulic leaks and oil contamination, addressing failures responsible for **60% of maintenance and failure-related costs** across construction-equipment rental fleets.
- Implemented ETL pipelines with sensor-unit standardization, JSON transformation and **Parquet analytical datasets**; integrated legacy data and built equipment-condition monitoring interfaces.
- Partnered with engineering and UX at a **defense AI startup** (raised a \$36M Series B in 2025) to turn user feedback into roadmap priorities for frontline machine-learning software.
- Reduced operating costs by **10%** through software implementation for an agricultural drone startup specializing in biological pest control.

Bear Flag Robotics / John Deere

Feb 2020 to Mar 2023

Product and Technical Lead, Mar 2021 to Mar 2023

Senior Software Engineer, Feb 2020 to Mar 2021

Acquired by John Deere in Aug 2021; continued within Deere's autonomy organization.

- Led **Carver, a \$40M autonomy project** combining electrification and autonomy for high-value crops. Shaped product strategy and the autonomy roadmap with Bear Flag's CEO and COO and Deere engineering teams; synthesized customer research and presented to Deere leadership.
- **Architected the web platform** responsible for **80,000+ autonomously tilled acres and \$1M+ in gross revenue**, connecting customer visibility and operator workflows with autonomous field operations.
- As **software lead**, was instrumental in moving Bear Flag from **R&D to serving 15 of the largest U.S. agribusinesses**. Led operational standardization and software demos across the transition.

Over | Acquired by GoDaddy

May to Oct 2019

Senior Software Engineer

- Contributed to **threefold enterprise-account growth** by leading web delivery for Over Teams. Established frontend architecture and engineering standards and helped bring the product to parity with iOS.

Twitch

May 2016 to Oct 2017

Software Engineer, Identity

- Built identity systems affecting **10M+ daily active users**, including OpenID Connect federation, username changes, registration experiments and authentication-latency improvements. Led multi-team rollouts.

TECHNICAL & PRODUCT SKILLS

Languages: Python, TypeScript, JavaScript

Applications & Systems: React, Node.js, FastAPI, AWS, APIs, ETL pipelines, observability

Product: Customer discovery, product strategy, roadmaps, enterprise account management, operator workflows

EDUCATION & PROFESSIONAL DEVELOPMENT

George Mason University: BA, Philosophy, 2012

University of Oxford: Distinguished Exchange Student Program, 2010 to 2011

Reforge: Product Strategy and Product-Led Growth, 2022 to 2023
