

Andrew Deal

Product / FDE | Industrial Software & Physical AI

Mountain View, CA · 415 200 9584 · deal.e.andrew@gmail.com
andrewdeal.info · linkedin.com/in/adeal · github.com/a-deal

Technical product leader and customer-facing engineer with 10+ years across software and product. Experience at Twitch, Bear Flag Robotics and John Deere.

\$40M

Carver autonomy project led
John Deere

\$3M+

Revenue from pilot conversions
Product & account strategy

15

Major U.S. agribusinesses served
Bear Flag software lead

EXPERIENCE

Pixel Foundry

Mar 2023 to present

Engineering & Product Consulting in Physical AI

Consulting for venture-backed industrial and defense AI startups; also independent engineering.

- **Converted construction pilots into \$3M+ in revenue.** Led product and account management strategy.
- **Architected the web platform for hydraulic condition monitoring**, covering detection and mitigation of leaks and oil contamination. Addressed failures responsible for **60% of maintenance/failure costs** in construction rental fleets. Client: industrial sensing startup, \$31M Series A announced in 2026.
- **Built sensor-data pipelines and monitoring interfaces:** standardized units, transformed raw files into JSON and Parquet datasets, and integrated legacy data.
- **Shaped frontline AI roadmap priorities** with engineering and UX, translating user feedback for a defense AI startup (\$36M Series B announced in 2025).
- **Reduced operating costs by 10%** through software implementation for an agricultural drone startup.

Bear Flag Robotics → John Deere

Feb 2020 to Mar 2023

Product and Technical Lead (Mar 2021 to Mar 2023)

Senior Software Engineer (Feb 2020 to Mar 2021)

Autonomous tractors. Acquired by John Deere in August 2021; continued in Deere's autonomy organization.

- **Led Carver, Deere's \$40M autonomy project for high-value crops.** Shaped product strategy and presented directly to Deere leadership. Turned customer research into an electrification and autonomy roadmap with Bear Flag's CEO and COO and Deere engineering teams.
- **Architected the web platform responsible for 80,000+ autonomously tilled acres and \$1M+ in gross revenue**, connecting customer visibility, operator workflows and autonomous tractor operations.
- **Software lead instrumental in moving Bear Flag from R&D to 15 of the largest U.S. agribusinesses.** Led operational standardization and software demos to support the transition.

Over | Senior Software Engineer

May to Oct 2019

Led web delivery for Over Teams, contributing to **threefold enterprise-account growth**. Established frontend architecture and engineering standards; helped bring the web product to iOS parity. Acquired by GoDaddy.

Twitch | Software Engineer, Identity

May 2016 to Oct 2017

Built identity systems affecting **10M+ daily active users**: OpenID Connect federation, username changes, registration experiments and authentication-latency improvements. Led multi-team rollouts.

TECHNICAL & PRODUCT TOOLKIT

Engineering: Python, TypeScript, JavaScript, React, Node.js, FastAPI, AWS, APIs, ETL, observability

Product: Customer discovery, product strategy, roadmaps, enterprise accounts, operator workflows

EDUCATION & PROFESSIONAL DEVELOPMENT

George Mason University: BA, Philosophy, 2012 · **Oxford:** Distinguished Exchange Student Program, 2010 to 2011 · **Reforge:** Product Strategy and Product-Led Growth, 2022 to 2023
